

ATTENTION:

All Legacy Core Residents and Businesses in Whitestown

The Town of Whitestown is applying for another grant from Indiana Office of Community and Rural Affairs to replace the remaining water main that have yet to be replaced in your area. The original water system in the Legacy Core of Whitestown was installed in the mid 1950's. Those pipes are under sized and have exceeded their life expectancy, which results in main breaks leading to interruption of water service, road closures, and reduced pressure for firefighting.

In 2009, approximately half of the water mains in your area were replaced and upsized. The Town continued to replace more sections of water main in 2011 & 2014. The Town's intent with this project is to fully complete the replacement of all remaining water main, install new fire hydrants and water meter pits.

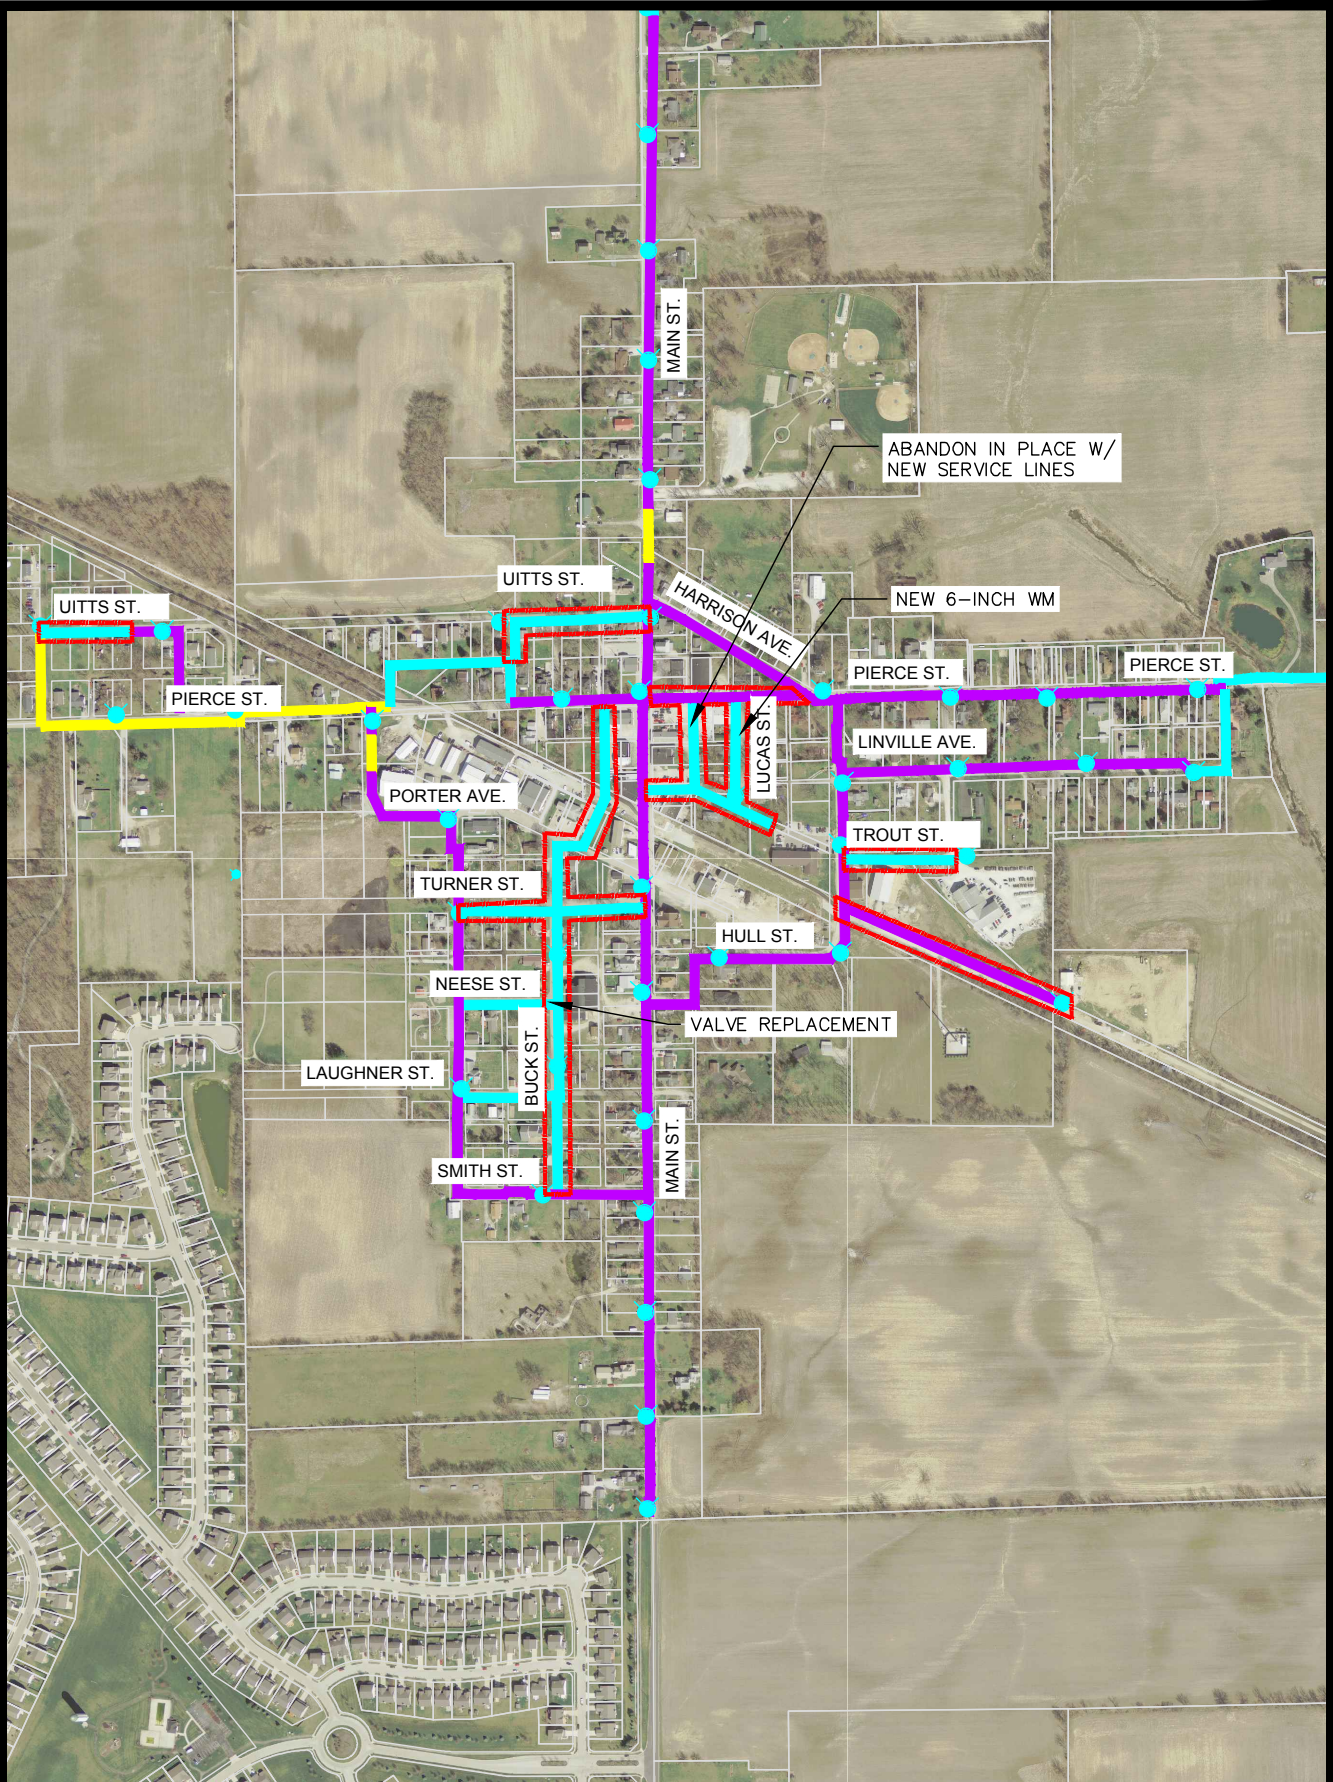

So, we need your help! We need letters of support from the residents and businesses describing your support for the project and the benefits of replacing old and small water mains such as:

1. Improved water service.
2. Virtual elimination of interruptions in service.
3. No more water main repair with road closures and construction.
4. Increased safety for Town personnel by not needing to repair water mains in potentially dangerous weather conditions.
5. Improved fire protection through increased flow to the area, enhancing public safety for the residents and businesses in Legacy Core.
6. Improved water quality by removing old cast iron water mains.

Grants are very competitive, and without letters of support from residences and businesses, we will not be able to secure grant funding for the water main replacements. A map of the planned water main replacements is included on the back side of this notice. We hope to apply for the grant in May 2019 and start construction in the spring of 2020 with completion in the summer of 2020. Please send all letters of support to:

Mr. Danny Powers - Public Works Director
Whitestown Town Hall
6210 Veterans Drive, Room 600
Whitestown, IN 46075
or
Email: dpowers@whitestown.in.gov

Please feel free to email or call with any questions at (317) 732-4328.
